MD. MANIK ULLAH

Full-Stack Web Developer

Full Stack Web Developer with years of experience in building responsive, scalable applications. Experienced in projects across healthcare, hospital management, crypto exchange, personal portfolios, and e-commerce. Focused on delivering smooth, interactive, and reliable web experiences from frontend to backend.

Experience

Aug 2023 - Dec 2024

KryptoLearn

Front-End Web Developer (Freelance)

A Crypto Exchange like Binance, Bybit, Coinbase, etc. My journey here began as a freelancer on Fiverr, where I first worked on the company's landing page. Recognizing the value of my work, I transitioned to a Frontend Dev of the company.
Tech Stack: JavaScript, VueJS, TailwindCSS, HTML5, CSS3, Git, Github, Docker.
Others: Figma & other designing tools for the UI.

May 2023 - Oct 2023

Koala Customer Care

Front-End Web Developer (Full-time)

A Customer Service Provider based out of Vancouver, BC, Canada. My journey here began as a freelancer on Upwork. Recognizing the value of our collaboration, I transitioned to a full-time role as a Frontend Dev.
Tech Stack: HTML5, CSS3, JavaScript.
Others: Photoshop Mocking & other designing tools for the UI.

Apr 2023 - Present

Fiverr, Upwork

Full-Stack Web Developer (Freelance)

My journey in Web Application Development took its initial steps on the Fiverr platform. It was on April 22, 2023, that I secured my first order—a significant milestone that marked the genesis of my career. Since then, I've undertaken numerous projects, each an opportunity to refine my craft. My Upwork journey commenced on May 4th, 2023, as I secured my inaugural contract with a company. Embracing the opportunity, I enthusiastically accepted the proposal, marking the beginning of a promising chapter in my freelance career.
Tech Stack: JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, PostgreSQL, MySQL, Prisma, Mongodb, Firebase, Material UI, TailwindCSS, HTML, CSS.

Projects

Amazon Clone

A responsive full-stack Amazon clone with product listing, cart, and authen-tication. Built with React, JS , NodeJS, ExpressJS, MySQL.

Weather App

A clean and minimal weather app that fetches and displays weather data. Built using React, TypeScript, and Tailwind CSS.

Restaurant

A fully responsive website for a real Bangladeshi restaurant, Emran's Heritage Home. Built with React, Tailwind, JS.

To-do App

A simple yet powerful To-Do app with task creation, deletion, and local storage. Built with React + TypeScript.
